E-NEWSLETTER ADVERTISING

2027 RATES · REDESIGNED EDITIONS

LEAD GENERATION · BRAND AWARENESS · SPONSORED CONTENT · THOUGHT LEADERSHIP · EXCLUSIVITY

Our daily e-newsletters have been rebuilt as a single column with no sidebar. Advertising moves from rotating banners to a **fixed ladder of named positions**, so you know exactly where your ad sits in every send. Every position below the leaderboard runs as either a **text ad with your logo** or an **in-article banner** — your choice, same rate.

THE PLACEMENT LADDER

LEAD — the leaderboard, full width, directly under the masthead and above the lead story. The largest unit in the email.

PREMIUM — the 2nd and 3rd ads, immediately after the lead story and after the first briefs, while attention is highest.

STANDARD — through the brief run, either side of Editor's Picks.

CLOSER — the final unit, after More Headlines, reaching readers who go the whole way.

CREATIVE SPECIFICATIONS

UNIT	RENDERS AT	SUPPLY	COPY & FILE
Banner Any position, top or in-content	**650 × 80** desktop **375 × 62** mobile	**1300 × 160** and **750 × 124** (2×) IAB 8:1 and 6:1. One pair of files runs in every banner position. An existing 728×90 is accepted and renders 650×80.	JPG, PNG or GIF. **100 KB** desktop, **50 KB** mobile. For animated GIFs, brand the first frame — some email clients show only that frame.
Text ad with logo or image	Logo **170 × 170** desktop **104 × 104** mobile	**340 × 340** (2×) square A logo (PNG, transparent) or a photo (JPG).	Headline up to **50** characters · body up to **320** characters · call to action up to **24** characters · destination URL. The whole block is one click.

Both banner placements are horizontal and follow the IAB New Ad Portfolio: the 8:1 leaderboard runs 600×75 to 1200×150 and the 6:1 smartphone banner 300×50 to 450×75, so every size above is a standard unit at its native size rather than a larger one squeezed down. Supplying both files means mobile gets a readable banner instead of an 8:1 creative compressed to 46px tall; clients that ignore media queries, such as Outlook on Windows, keep the desktop file.

RATES

BY POSITION AND EDITION · ALL RATES PER MONTH

LEAD GENERATION · BRAND AWARENESS · SPONSORED CONTENT · THOUGHT LEADERSHIP · EXCLUSIVITY

The Lead position holds the leaderboard rate from the current card, and each placement below it steps down from there. AR Today sells in two three-edition packages, and taking both brings you to the full-run rate — a saving of roughly 12% against buying them separately. SubPrime publishes three mornings a week and sells at one rate for all three.
